**W**hile the Corona pandemic has devastated the whole world, has scared humans from humans, yet people have stood together to help each other. but one religious dispute has divided humans into two groups. Religion is such an intoxication that only makes a person weak and only makes oneself feel superior to others, Creates fear in the minds of people and pushes them on the path of ruin.

The dispute between Israel and Palestine is also not untouched by religion. Israel- Arab dispute is also based on religion. If we analyze the whole controversy then we will come to know how humanity has been exploited because of religion. How a person exploits people of other religions under the guise of religion to make oneself superior to others.

*The Path Towards Our Aim*

The issue of dispute between Israel and Arab countries is very old and is becoming more intense with time. In Israel- Arab dispute, we can see how in one stroke lakhs of people are evicted from their place of birth due to such religious dispute and they are given shelter in different countries to save their pride and prestige. is. Have to take it, and beg to get back your place of birth Millions of people are massacred because of religion.

“Religion is the cause of all the problems in the world.”

This question is very important in today's era. Is it as difficult to treat all human beings as equals and to give to others as we all prioritize ourselves ?

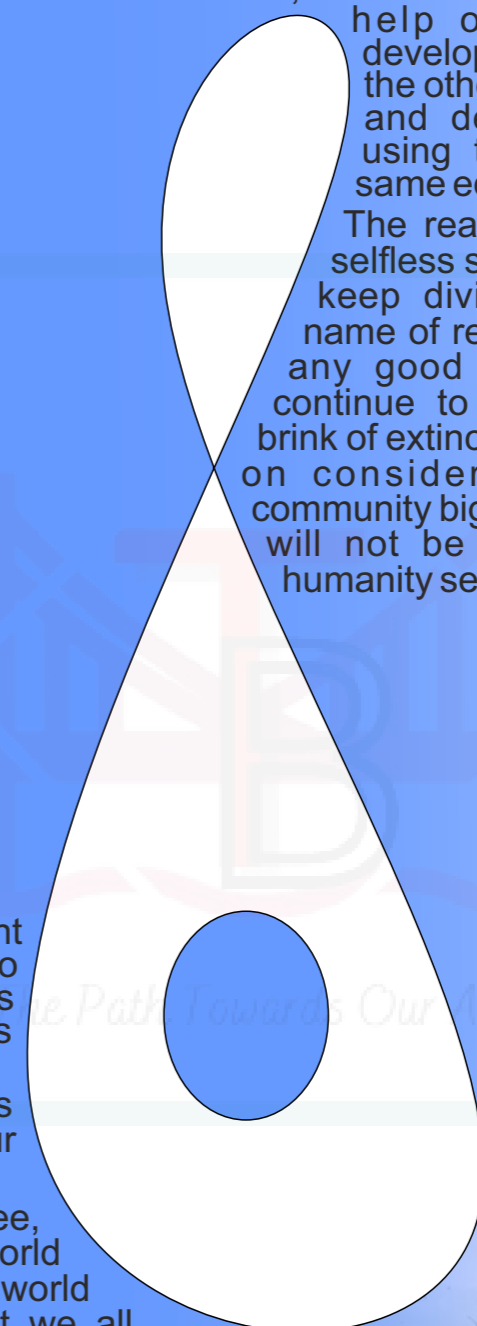

We cannot treat everyone as equal unless we change our thinking.

Open your heart once and see, come together and see. This world is not hungry for religion, this world is hungry for love, why don't we all change ourselves then see because the biggest beginning is with ourselves and if we all change ourselves then the world will be a beautiful place to live. Where there is no need for weapons, there is no discrimination of any kind, where there will only love.

In today's era, the question arises whether religion is advancing humanity or pulling it back thousands of years. On one hand, we have reached the moon with the help of science and also developed new equipment, on the other hand, we are shaming and destroying humanity by using the same science and same equipment.

The real meaning of religion is selfless service. As long as we all keep dividing ourselves in the name of religion, we can never do any good to humanity and will continue to push humanity to the brink of extinction. As long as we keep on considering religion as our community big and others as small, we will not be able to openly serve humanity selflessly.

## About Us

THE BRIDGE is a unit of "13angle". The Bridge is an editorial magazine focused on providing quality editorial content on a variety of topics. And the content is based on the personal opinion of our authors. Our editorial content is developed after very careful study and analysis of the relevant topic. And any problem related to that topic is also suggested by our authors.

Here, at "The Bridge" we provide information in the form of editorial content. The editorial contents are personal views but are heavily influenced by information as each piece of information depends on one's personal views.

"The Bridge" is a 'people's magazine' that provides an open opportunity even for those who can write but do not have a proper platform to publish their work.

So let's join THE BRIDGE.
